PROF. L. E. SCRIVEN, *Department of Chemical Engineering and Materials Science, University of Minnesota, Minneapolis, Minnesota* 55455, *U.S.A.*

ASSISTANT EDITORS

DR M. D. COWLEY (*Cambridge*), PROF. S. H. DAVIS (*Johns Hopkins*)
DR H. E. HUPPERT (*Cambridge*), DR M. E. MCINTYRE (*Cambridge*)

Authors wishing to have papers published in the JOURNAL should communicate them to any Editor or Associate Editor named above, choosing one in their own country where possible.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published twice a month. Single parts £2.50 net ($7.50 in the U.S.A.) plus postage. Four parts form a volume. The subscription price of a volume (which includes postage) is £8.00 net ($25.00 in the U.S.A.).

Copies of the journal for subscribers in the United States of America are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y.

Claims for missing issues will be considered only if made after receipt of the subsequent issue.

CONTENTS TO VOLUME 45

PART 1 15 JANUARY 1971

Viscous rotational stagnation-point flow. ALAN S. HERSH *page* 1

Unsteady viscous flow in a curved pipe. W. H. LYNE 13

Finite amplitude instability of time-dependent flows. STEPHEN H. DAVIS 33

Mixed convection from long horizontal cylinders. B. GEBHART and L. PERA 49

Measurements for the wave-number/phase velocity spectrum of wall pressure beneath a turbulent boundary layer. J. A. B. WILLS 65

Linear stability of the dissipative, two-fluid, cylindrical Couette problem. Part 1. The stably-stratified hydrodynamic problem. G. P. SCHNEYER and S. A. BERGER 91

On hydromagnetic precession in a cylinder. ROGER F. GANS 111

Spin-up of a strongly stratified fluid in a sphere. ALFRED CLARK, PATRICIA A. CLARK, JOHN H. THOMAS and NIEN-HON LEE 131

Viscosity-induced instability of a one-dimensional lattice of falling spheres. JOSEPH M. CROWLEY 151

The three-dimensional distributions of tangential velocity and total-temperature in vortex tubes. C. U. LINDERSTRØM-LANG 161

Viscous flow in a deformable rotating container. STEVEN T. SUESS 189

A note on vortex streets behind circular cylinders at low Reynolds numbers. D. J. TRITTON 203

PART 2 30 JANUARY 1971

Bluff bodies and vortex shedding – a report on Euromech 17. W. A. MAIR and D. J. MAULL 209

Drag reduction in rough pipes. P. S. VIRK 225

Steady flow in the region of closed streamlines in a cylindrical cavity. J. L. DUDA and J. S. VRENTAS 247

Heat transfer in a cylindrical cavity. J. L. DUDA and J. S. VRENTAS 261

A study of free jet impingement. Part 1. Mean properties of free and impinging jets. COLEMAN DUP. DONALDSON and RICHARD S. SNEDEKER 281

Two problems in the gravity flow of granular materials. M. A. GOODMAN and S. C. COWIN 321

XUM

Instability and secondary motion in a rotating channel flow. JOHN E. HART *page* 341

The asymptotic stability of a bounded rotating fluid heated from below: conductive basic state. G. M. HOMSY and J. L. HUDSON 353

Wave-induced oscillations in harbours of arbitrary geometry. JIIN-JEN LEE 375

Numerical simulation of developing and decaying two-dimensional turbulence. D. K. LILLY 395

REVIEW

Circulatory and Respiratory Mass Transport, edited by G. E. W. Wolstenholme and Julie Knight 416

PART 3 15 FEBRUARY 1971

An elastic sublayer model for drag reduction by dilute solutions of linear macromolecules. P. S. VIRK 417

The source-sink flow in a rotating system and its oceanic analogy. HAN-HSIUNG KUO and GEORGE VERONIS 441

Cholesteric energies. JAMES T. JENKINS 465

A study of free jet impingement. Part 2. Free jet turbulent structure and impingement heat transfer. COLEMAN DUP. DONALDSON, RICHARD S. SNEDEKER and DAVID P. MARGOLIS 477

Boundary-layer separation on a sphere in a rotating flow. JOHN W. MILES 513

Wind-generated waves in thin liquid films with soluble contaminant. F. I. P. SMITH and ALEX D. D. CRAIK 527

On stationary and travelling vortex breakdowns. TURGUT SARPKAYA 545

Laminar momentum jets in a stratified fluid. E. J. LIST 561

Lateral diffusion of large particles in turbulent pipe flow. B. B. SHARP and I. C. O'NEILL 575

Asymptotic solution for plume at very large and small Prandtl numbers. H. K. KUIKEN and ZEËV ROTEM 585

The formation of shock waves in a dense gas using a molecular-dynamics type technique. A. K. MACPHERSON 601

REVIEWS

Theoretical Hydrodynamics, 5th Edition, by L. M. Milne-Thomson 622

Strömungsmechanik, by E. Truckenbrodt 624

PART 4 27 FEBRUARY 1971

The motion of long slender bodies in a viscous fluid. Part 2. Shear flow. R. G. COX *page* 625

Baroclinic stability under non-hydrostatic conditions. PETER H. STONE 659

An exact solution of linearized flow of an emitting, absorbing and scattering grey gas. PING CHENG and A. LEONARD 673

Finite-amplitude stability of pipe flow. A. DAVEY and H. P. F. NGUYEN 701

Shock-wave reflexion in a relaxing gas. RONALD K. HANSON 721

The effect of a depth discontinuity on Kelvin wave diffraction. H. G. PINSENT 747

Boundary-value problems in the kinetic theory of gases. Part 2. Thermal creep. M. M. R. WILLIAMS 759

Wave propagation in random media. M. S. HOWE 769

On wave scattering by random inhomogeneities, with application to the theory of weak bores. M. S. HOWE 785

A numerical study of the Bénard cell. ANDRÉ CABELLI and G. DE VAHL DAVIS 805

INDEX TO VOLUME 45 830

JOURNAL OF FLUID MECHANICS

The JOURNAL OF FLUID MECHANICS exists for the publication of theoretical and experimental investigations of all aspects of the mechanics of fluids.

EDITORS

PROF. G. K. BATCHELOR, DR H. K. MOFFATT

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. G. F. CARRIER, *Pierce Hall, Harvard University, Cambridge* 38, *Massachusetts* 02138, *U.S.A.*

DR W. C. GRIFFITH, *Building* 102, *Plant* 1, *Lockheed Missiles and Space Company, P.O. Box* 504, *Sunnyvale, California* 94088, *U.S.A.*

PROF. M. J. LIGHTHILL, *Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England*

PROF. J. W. MILES, *Institute of Geophysics and Planetary Physics, University of California, La Jolla, California* 92038, *U.S.A.*

PROF. O. M. PHILLIPS, *Department of Mechanics, The Johns Hopkins University, Baltimore* 18, *Maryland* 21218, *U.S.A.*

PROF. L. E. SCRIVEN, *Department of Chemical Engineering and Materials Science, University of Minnesota, Minneapolis, Minnesota* 55455, *U.S.A.*

ASSISTANT EDITORS

PROF. F. P. BRETHERTON (*Johns Hopkins*), DR M. D. COWLEY (*Cambridge*)
PROF. S. H. DAVIS (*Johns Hopkins*), DR M. E. MCINTYRE (*Cambridge*)

Authors wishing to have papers published in the JOURNAL should communicate them to any Editor or Associate Editor named above, choosing one in their own country where possible.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published twice a month. Single parts £2.50 net ($7.50 in the U.S.A.) plus postage. Four parts form a volume. The subscription price of a volume (which includes postage) is £8.00 net ($25.00 in the U.S.A.).

Copies of the journal for subscribers in the United States of America are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y.

Claims for missing issues will be considered only if made after receipt of the subsequent issue.

CONTENTS OF VOLUME 46

PART 1 15 MARCH 1971

Some aspects of the initial-value problem for the inviscid motion of a contained, rotating, weakly-stratified fluid. J. S. ALLEN *page* 1

On fluid motions induced by an electric current source. C. SOZOU 25

Two-phase concave-type corner flows. J. VAL. HEALY 33

An experimental investigation of pulsating turbulent water flow in a tube. J. H. GERRARD 43

Convection in a rotating annulus uniformly heated from below. ROBERT P. DAVIES-JONES and PETER A. GILMAN 65

Calculation of boundary-layer development using the turbulent energy equation: compressible flow on adiabatic walls. P. BRADSHAW and D. H. FERRISS 83

Shock waves and non-stationary flow in a duct of varying cross-section. NARUYOSHI ASANO 111

Wave forces on a circular dock. C. J. R. GARRETT 129

A note on variational principles for surface-wave scattering. JOHN W. MILES 141

Radiation and scattering of water waves by rigid bodies. J. L. BLACK, C. C. MEI and M. C. G. BRAY 151

Skin friction and surface temperature of an insulated flat plate fixed in a fluctuating stream. HIROSHI ISHIGAKI 165

An investigation of the forces of flat plates normal to a turbulent flow. P. W. BEARMAN 177

A spherical envelope approach to ciliary propulsion. J. R. BLAKE 199

PART 2 29 MARCH 1971

Non-linear Kelvin–Helmholtz instability. ALI HASAN NAYFEH and WILLIAM S. SARIC 209

Heat transfer at high Péclet number from a small sphere freely rotating in a simple shear field. ANDREAS ACRIVOS 233

Resonant response of harbours: an equivalent-circuit analysis. JOHN W. MILES 241

A non-linear effect in the capillary instability of liquid jets. D. F. RUTLAND and G. J. JAMESON 267

XUM

The reflexion of internal/inertial waves from bumpy surfaces. P. G. Baines *page* 273

A note on turbulent shear-layer reattachment downstream of a backward-facing step in confined supersonic two-dimensional flow. T. Mukerjee, A. Farshi and B. W. Martin 293

Experiments on the instability of stratified shear flows: miscible fluids. S. A. Thorpe 299

Influence of surface roughness on the cross-flow around a circular cylinder. Elmar Achenbach 321

Hydromechanics of swimming propulsion. Part 1. Swimming of a two-dimensional flexible plate at variable forward speeds in an inviscid fluid. T. Yao-Tsu Wu 337

Waves in an electrically conducting rotating liquid. Adabala Ramachandra Rao 357

Flow and pressure drop in systems of repeatedly branching tubes. T. J. Pedley, R. C. Schroter and M. F. Sudlow 365

Zero and negative entrainment in turbulent shear flow. M. R. Head and P. Bradshaw 385

On the effect of particle couples on the motion of a dilute suspension of spheroids. L. G. Leal 395

Part 3 13 April 1971

Calculation of three-dimensional turbulent boundary layers. P. Bradshaw 417

On waves generated in rotating stratified liquids by travelling forcing effects. V. Subba Rao and G. V. Prabhakara Rao 447

Potential flow of segmental jet deflectors. H. Y. Chang and J. F. Conly 465

Measurements of subsonic jet noise and comparison with theory. P. A. Lush 477

The diffraction of tides by a narrow channel. V. T. Buchwald 501

Laminar convection of a radiating gas in a vertical channel. R. Greif, I. S. Habib and J. C. Lin 513

Hydromechanics of swimming propulsion. Part 2. Some optimum shape problems. T. Yao-Tsu Wu 521

Hydromechanics of swimming propulsion. Part 3. Swimming and optimum movements of a slender fish with side fins. T. Yao-Tsu Wu 545

Viscous tails in Hele-Shaw flow. C. J. Wood 569

On the scattering of aerodynamic noise. D. G. Crighton and F. G. Leppington 577

Wake characteristics of two-dimensional perforated plates normal to an air-stream. I. P. Castro *page* 599

The solitary wave in water of variable depth. Part 2. R. Grimshaw 611

Reviews

Mathematical Methods in Kinetic Theory, by Carlo Cercignani 623

The Mathematical Theory of Non-Uniform Gases, by Sydney Chapman and T. G. Cowling 623

Microscopic Thermodynamics, by Felix J. Pierce 623

Part 4 27 April 1971

The fluid mechanics of the ureter with an inserted catheter. Rudolf Roos and Paul S. Lykoudis 625

Measurements in a subsonic turbulent jet using a quantitative schlieren technique. M. R. Davis 631

Three-dimensional MHD duct flows with strong transverse magnetic fields. Part 2. Variable-area rectangular ducts with conducting sides. J. S. Walker, G. S. S. Ludford and J. C. R. Hunt 657

The effect of weak Brownian rotations on particles in shear flow. L. G. Leal and E. J. Hinch 685

An asymptotic theory of the jet flap in three dimensions. Naoyuki Tokuda 705

Boundary-layer separation at a free streamline. Part 2. Numerical results. R. C. Ackerberg 727

Jet flow instability of an inviscid compressible fluid. William Blumen 737

Vortex shedding from circular cylinders at low Reynolds numbers. M. Gaster 749

Directional acoustic radiation from a supersonic jet generated by shear layer instability. Christopher K. W. Tam 757

The boundary layer on a flat plate moving transversely in a rotating, stratified fluid. Larry G. Redekopp 769

Entry flow in a channel. Part 2. S. D. R. Wilson 787

Convection in a fluid with two phases. F. H. Busse and G. Schubert 801

The stress generated in a non-dilute suspension of elongated particles by pure straining motion. G. K. Batchelor 813

Index to Volume 46 830

CONTENTS TO VOLUME 47

PART 1 14 MAY 1971

The effect of stable thermal stratification on the stability of viscous parallel flows. K. S. GAGE *page* 1

Separation in oscillating laminar boundary-layer flows. R. A. DESPARD and J. A. MILLER 21

The effect of atmospheric conditions on plume rise. P. R. SLAWSON and G. T. CSANADY 33

Instability due to heat diffusion in a stably stratified fluid. PIERRE WELANDER 51

Stability of circular Couette flow of binary mixtures. WILLIAM S. SARIC and ZALMAN LAVAN 65

On acoustic refraction by duct shear layers. P. N. SHANKAR 81

Comparison of theory and experiment in peristaltic transport. F. C. P. YIN and Y. C. FUNG 93

Thermal convection with large viscosity variations. K. E. TORRANCE and D. L. TURCOTTE 113

Electrohydrodynamics of a current-carrying semi-insulating jet. J. R. MELCHER and E. P. WARREN 127

A model of the mature hurricane. G. F. CARRIER, A. L. HAMMOND and O. D. GEORGE 145

The slow transverse motion of a flat plate through a non-diffusive stratified fluid. G. S. JANOWITZ 171

Turbulent air flow over the dominant component of wind-generated water waves. P. C. CHANG, E. J. PLATE and G. M. HIDY 183

PART 2 31 MAY 1971

A tracer dispersion study of the drag-reduction effect in a turbulent pipe flow. A. W. BRYSON, VR. ARUNACHALAM and G. D. FULFORD 209

Instability of a thermal boundary layer in a constant electric field. ROBERT J. TURNBULL 231

A rapidly varied flow phenomenon in a two-layer flow. D. L. WILKINSON and I. R. WOOD 241

Stability of convection in containers of arbitrary shape. DANIEL D. JOSEPH 257

XUM

Collapse of an initially spherical vapour cavity in the neighbourhood of a solid boundary. MILTON S. PLESSET and RICHARD B. CHAPMAN *page* 283

Strong streaming induced by a moving thermal wave. E. J. HINCH and GERALD SCHUBERT 291

Instabilities of convection rolls in a high Prandtl number fluid. F. H. BUSSE and J. A. WHITEHEAD 305

Burgers turbulence model for a channel flow. JON LEE 321

The non-linear evolution of Stokes waves in deep water. VINCENT H. CHU and CHIANG C. MEI 337

Dynamical evolution of two-dimensional unstable shear flows. N. J. ZABUSKY and G. S. DEEM 353

Energy stability of the buoyancy boundary layer. JOSEPH J. DUDIS and STEPHEN H. DAVIS 381

Energy stability of the Ekman boundary layer. JOSEPH J. DUDIS and STEPHEN H. DAVIS 405

REVIEWS

Physical and Engineering Aspects of Thermal Pollution, by F. L. Parker and P. A. Krenkel 414

Global Effects of Environmental Pollution, edited by S. F. Singer 414

PART 3 14 JUNE 1971

Structure of jets in rotating systems. SULOCHANA GADGIL 417

The Magnus or Robins effect on rotating spheres. H. M. BARKLA and L. J. AUCHTERLONIE 437

Response behaviour of hot wires in shear flow. F. B. GESSNER and G. L. MOLLER 449

Forced axial flow between rotating concentric cylinders. VICTOR BARCILON and HOWARD C. BERG 469

Turbulent flow in wavy pipes. SHENG-TIEN HSU and JOHN F. KENNEDY 481
